

HULK MAX: HYBRID COATING

**HULK
SYSTEMS**

LOW SLOPE ROOFING SYSTEM SOLUTION

HULK MAX: Hybrid Coating is a fast set, 100% solids, zero VOC technology designed to provide maximum waterproofing protection for decades. Its excellent balance of abrasion and impact resistance provides the highest performing "shell-like" protection for a multitude of roof surfaces.

TECHNOLOGY AND DESIGN LIFE PERFORMANCE GUARANTEED

Hulk Systems: Hybrid Coating is a two component, plural spray applied, elastomeric membrane and is considered the top tier waterproofing material in the market. Water ingress often finds its way into a building, whether it's through a seam or joints.

Hulk's hybrid coating is a premium choice due to its ease of installation and maximum design life performance. Hulk's hybrid coating is also specifically designed to wet out geotextiles to create a tough, durable liner/coating. For low sloped foam roofing, Hulk's hybrid can fuse onto the foam surface with a good adhesion for normal operation, and enhanced adhesion can be easily obtained when the foam surface is mechanically abraded. For maximum color retention add a light coat of Hulk: Aliphatic Polyurethane.

KEY BENEFITS

- 100% Solids
- Class 1 Fire Rated
- 1:1 chemistry with balanced viscosity ratios between parts "A" & "B"
- Requires 1 coat at 60 to 80 MILS
- Cures in minutes
- Applied in cold temperatures
- Zero seams or penetrations
- Fully submersible coating
- High resistance to mold, mildew, salts and other environmental pollutants
- Impervious to ponding water issues
- Bridges cold joints
- Use on foam, concrete, SBS, metal & spudded tar & gravel, (with Hulk Systems: Membrane Primer)
- Zero VOC'S / solvents - installer safe
- Excellent adhesion to most substrates
- Cold applied eliminating expensive fire insurance and toxic fumes (Torch-on roofing products)
- In service for multiple uses including; the U.S Navy, Walt Disney World, and major LNG projects for undersea waterproofing.
- Hulk Systems provides technical support and premium installer training
- Passed all standards and ASTM testing
