TECHNICAL OPINION LETTER

Subject: Engineer's Stamp of Approval for Hulk Systems Waterproofing Specification Documents

To whom it may concern,

I hope this letter finds you well. I am writing to formally convey my professional assessment and stamp of approval regarding following documentation:

- Hulk Systems' specification for cold-applied waterproofing Concrete and Insulated Concrete Form (ICF) for Foundation Walls.
- Global Coatings Advisors' GCA 6839 waterproofing specifications.

As a qualified engineer specializing in waterproofing and corrosion protection solutions, I have carefully reviewed the specifications and conducted a thorough analysis of their compliance with industry standards and local regulations within our jurisdiction.

it is my professional opinion that the specification sequence demonstrates a consistent constructability approach to waterproofing underground structures. Should the specification be properly followed and there us not omissions or manufacturing flaws, the waterproofing system would meet or exceed all requirements for light commercial, high-end residential, and multi-family waterproofing within our jurisdiction.

I have diligently reviewed and analyzed the provided documentation, including the in-house and GCA 6839 waterproofing specifications, to ensure their accuracy, compliance, and efficiency. I am confident that these specification documents adhere to the highest standards in the industry, surpassing the necessary requirements for waterproofing in the designated applications.

Should you require any additional information or clarification regarding my evaluation or the reviewed specifications, please do not hesitate to contact me at your convenience. I remain at your disposal to provide any further assistance or expertise that may be necessary.

Thank you for the opportunity to assess and provide my professional endorsement for the Hulk Systems waterproofing specifications. It is my pleasure to contribute to the advancement and assurance of quality standards in the field of waterproofing.

Yours sincerely,

Mario Moreno P.Eng.
