

HULK SYSTEMS

CONCRETE SYSTEM

Available in black (popular), promo-green, grey and white. High performance and clean. This system is fast and easy to install, and zero splash-back means you won't be wearing it at the end of the day. Plus, it's 100% water cleanup for your hands and equipment. Leave your harsh solvents at home.

SUN SAFE & ECO-FRIENDLY

3 key products make up the Hulk Concrete System. The mastic, liquid applied waterproofing, and the textile, although the textile is optional on concrete foundations. Once it has been applied, you can take your time back-filling your foundation. Unlike other industry leading products, the Hulk Concrete System isn't compromised by UV exposure as it contains zero bituminous resins that are prone to drying out and cracking and toxic for both the applicator and environment.
