WHAT KIND OF **SPRAY PUMP** DO I NEED?

HULK SYSTEMS

Let's look at the minimum pump specs for spraying Hulk's Acrylic Waterproofing! This will give you a starting point to provide sales reps when shopping around for your next sprayer!

You can buy a variety of pumps to spray Hulk's Acrylic Waterproofing, but the standard starter pump type would be an electric airless unit. There are also gas-powered pumps and hydraulic-driven pumps, but those are getting into higher pricing brackets.

MINIMUM PUMP REQUIREMENTS	
Type	Electric airless sprayer
PSI	3,000 psi
Tip Compatibility	521 or greater
Material Viscosity	15-20,000 PS @ 6RPM (elastomeric)
Usage	50 gallons per week
